

(a) Sensitivity to soil moisture changes

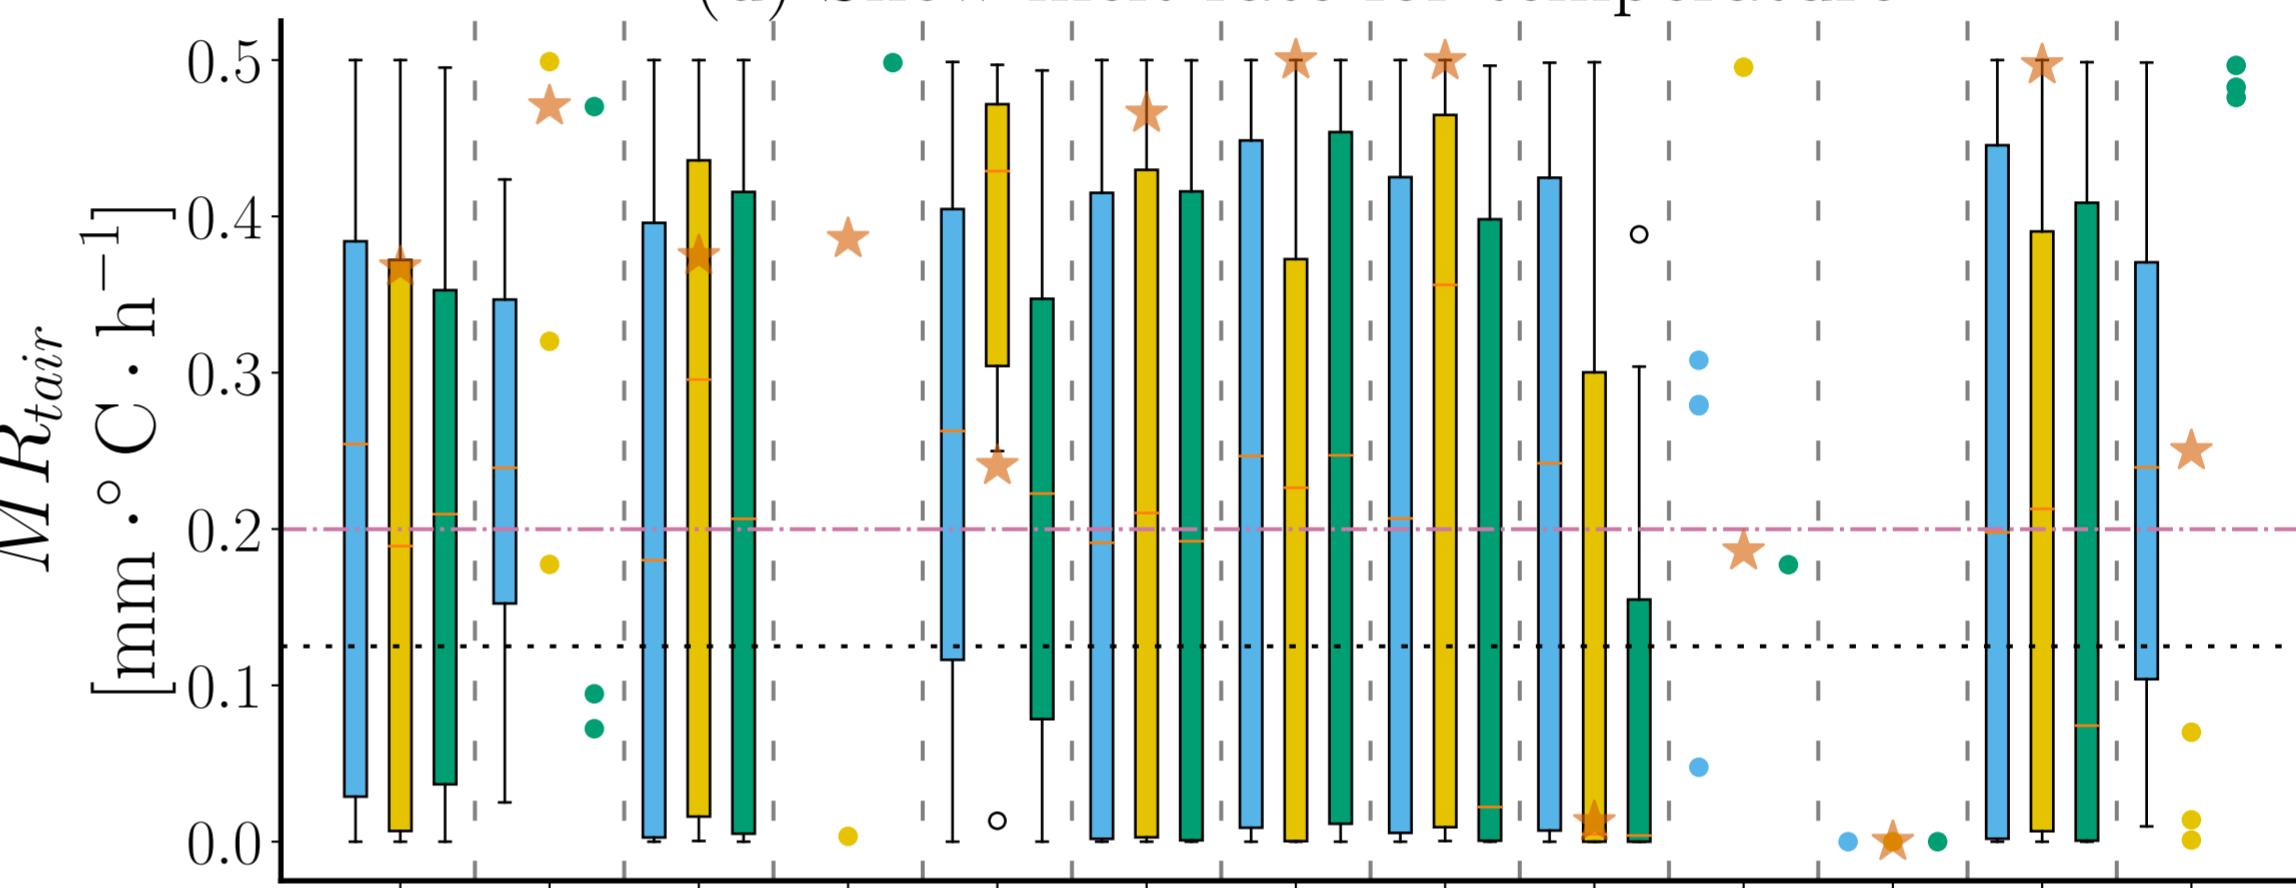

(b) Lag parameter for soil moisture effect

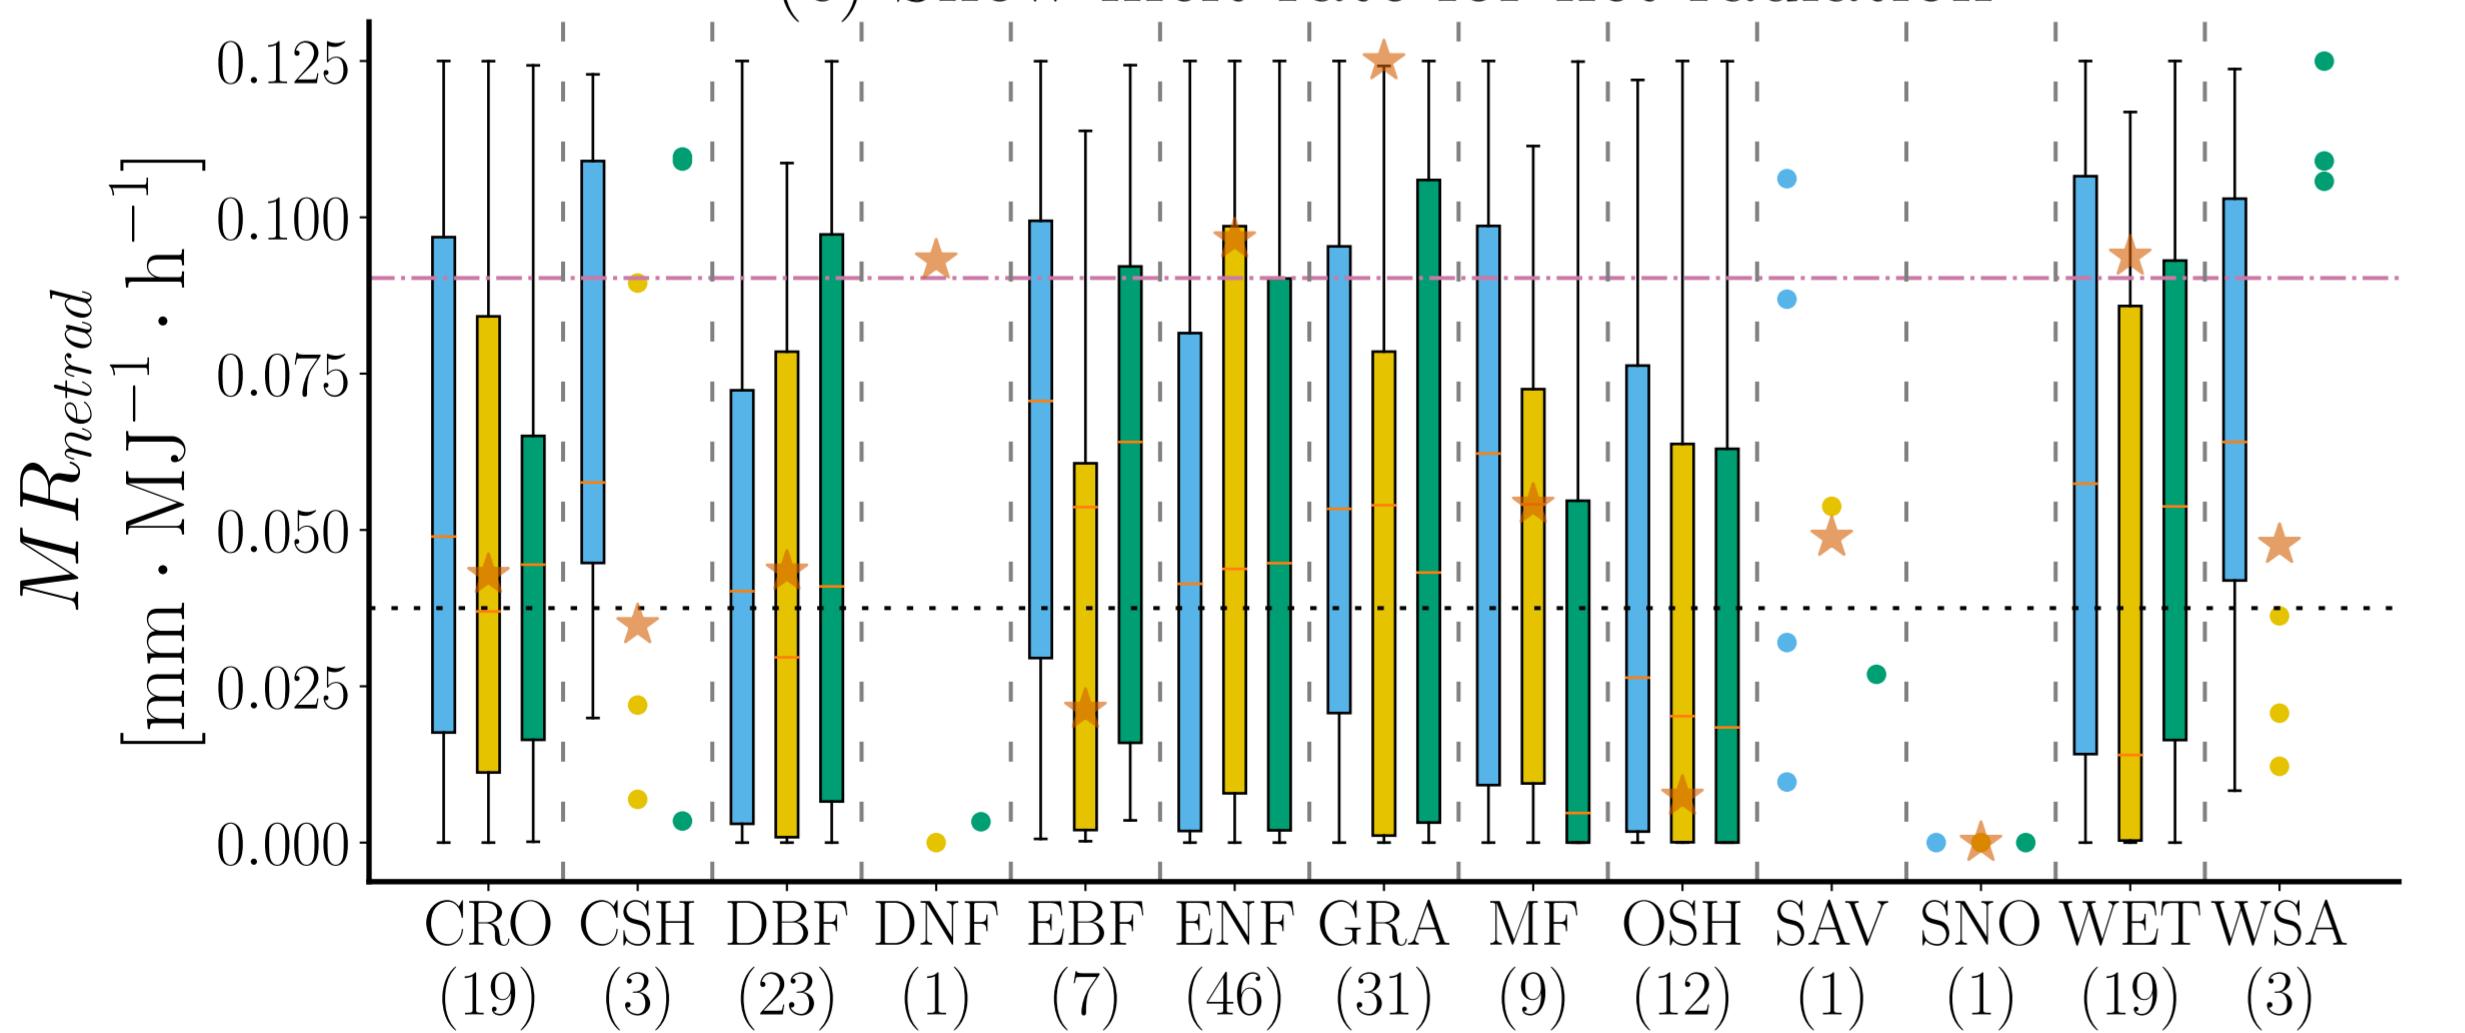

(c) Scalar factor for potential evapotranspiration

(d) Snow melt rate for temperature

(e) Snow melt rate for net radiation

PFT

- █ per site-year parameterization
- █ per site parameterization using $Cost^{IAV}$
- █ per site parameterization

- ★ per PFT parameterization
- global parameterization
- initial parameter value
